Journal of Comparative Physiology A

Sensory, Neural, and Behavioral Physiology

Volume 166 1989/1990

Founded in 1924 by K. von Frisch and A. Kühn, Volumes 1–29 (1934) under the title "Zeitschrift für wissenschaftliche Biologie, Abt. C: Zeitschrift für vergleichende Physiologie". Volumes 30–76 (1972) published as "Zeitschrift für vergleichende Physiologie". Volumes 77–92 (1974) published under the title "Journal of Comparative Physiology". Beginning with Volume 93 (1974) called "Journal of Comparative Physiology A · Sensory, Neural, and Behavioral Physiology / B · Metabolic and Transport Functions". Beginning with Volume 123 (1978) Section B called "Biochemical, Systemic, and Environmental Physiology". Beginning with Volume 154 (1984), this journal was divided into two separate journals, A and B.

Editorial Board

H. Autrum, München
F.G. Barth, Wien
W. Heiligenberg, La Jolla, CA
G. Neuweiler, München

Advisory Board

K. Aoki, Tokyo
H. Atwood, Toronto
J.A. Coles, Bordeaux
S. Daan, Haren
F. Delcomyn, Urbana, IL
R. DeVoe, Bloomington, IN
R. Hardie, Cambridge
F. Huber, Seewiesen
M. Konishi, Pasadena, CA
M.F. Land, Brighton
H.C. Lüttgau, Bochum
H. Markl, Konstanz
A. Michelsen, Odense
W.R.A. Muntz, Clayton (Melbourne)
C.H. Page, Piscataway, NJ
F. Papi, Pisa
J.D. Pettigrew, St. Lucia (Brisbane)
C.L. Prosser, Urbana, IL
J.D. Pye, London
H.F. Rowell, Basel
D.G. Stavenga, Groningen
N.J. Strausfeld, Tucson, AZ
U. Thurm, Münster
R. Wehner, Zürich

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher, and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page, or a minimum of US $1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-7594, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents

Aicher B, Tautz J: Vibrational communication in the fiddler crab, *Uca pugilator*. I. Signal transmission through the substratum 345

Allan S → Gerhardt HC

Angstadt JD, Stretton AOW: Slow active potentials in ventral inhibitory motor neurons of the nematode *Ascaris* 165

Armstrong SM → Kennedy GA

Arnold MG → Hawryshyn CW

Atema J → Voigt R

Backhaus W → Menzel R

Balaban P, Chase R: Stimulation of mesocerebrum in *Helix aspersa* inhibits the neural network underlying avoidance behavior 421

Barclay RMR → Faure PA

Barth FG → Schüch W

Blagburn JM: Synaptic specificity in the first instar cockroach: patterns of monosynaptic input from filiform hair afferents to giant interneurons 133

Block GD → Ralph MR

Bone RA → Stark WS

Bowering E → Hawryshyn CW

Bowmaker JK → Whitmore AV

Brandes C, Menzel R: Common mechanisms in proboscis extension conditioning and visual learning revealed by genetic selection in honeybees (*Apis mellifera capensis*) 545

Brodfuehrer PD, Hoy RR: Ultrasound sensitive neurons in the cricket brain 651

Chase R → Balaban P

Cheng K: More psychophysics of the pigeon's use of landmarks 857

Christianson JS → Stark WS

Cole RL → Hawryshyn CW

Coleman GJ → Kennedy GA

Colwell CS, Page TL: A circadian rhythm in neural activity can be recorded from the central nervous system of the cockroach 643

Consi TR, Passani MB, Macagno ER: Eye movements in *Daphnia magna*. Regions of the eye are specialized for different behaviors 411

Coombe PE, Srinivasan MV, Guy RG: Are the large monopolar cells of the insect lamina on the optomotor pathway? 23

Crews D → Mendonça MT

Cronin TW, Marshall NJ: Multiple spectral classes of photoreceptors in the retinas of gonodactyloid stomatopod crustaceans 261

Dallos P → Warchol ME

Delaney K, Gelperin A: Cerebral interneurons controlling fictive feeding in *Limax maximus*. I. Anatomy and criteria for re-identification 297

Delaney K, Gelperin A: Cerebral interneurons controlling fictive feeding in *Limax maximus*. II. Initiation and modulation of fictive feeding 311

Delaney K, Gelperin A: Cerebral interneurons controlling fictive feeding in *Limax maximus*. III. Integration of sensory inputs 327

Dudel J, Franke Ch, Hatt H: A family of glutamatergic, excitatory channel types at the crayfish neuromuscular junction 757

Duifhuis H → Wubbels RJ

Dulka JG → Sorensen PW

Dumortier B → Lavialle M

Ebihara S → Oshima I

Edwards DH → Simon TW

Engelhard K-H → Lakes R

Faure PA, Fullard JH, Barclay RMR: The response of tympanate moths to the echolocation calls of a substrate gleaning bat, *Myotis evotis* 843

Ferragamo M → Simmons JA

Fix Ventura D → Menzel R

Franke Ch → Dudel J

Fraser K, Heitler WJ: Thoracic output of crayfish giant fibres. II. The segmental giant neurone 125

Fraser K → Heitler WJ

Friesen WO: Neuronal control of leech swimming movements. I. Inhibitory interactions between motor neurons 195

Friesen WO: Neuronal control of leech swimming movements. II. Motor neuron feedback to oscillator cells 115 and 28 205

Fukushi T: Learning and discrimination of coloured papers in the walking blowfly, *Lucilia cuprina* 57

Fullard JH → Faure PA

Funakoshi M → Ninomiya Y

Gelperin A → Delaney K

Gerhardt HC, Allan S, Schwartz JJ: Female green treefrogs (*Hyla cinerea*) do not selectively respond to signals with a harmonic structure in noise 791

Gerhardt HC → Schwartz JJ

Geusz ME, Page TL: The circadian rhythm and photosensitivity of small impulses of the *Bulla* eye 795

Gnatzy W → Schmidt M

Gnatzy W → Seyfarth E-A

Goto M → Oshima I

Gras H, Hörner M, Runge L, Schürmann F-W: Prothoracid DUM neurons of the cricket *Gryllus bimaculatus* – responses to natural stimuli and activity in walking behavior 901

Guy RG → Coombe PE

Guy RG → Srinivasan MV

Hamanaka T → Seidou M

Hammer K → Seyfarth E-A

Hara TJ → Sorensen PW

Hateren JH van, Laughlin SB: Membrane parameters, signal transmission, and the design of a graded potential neuron 437

Hatt H → Dudel J

Hawryshyn CW, Arnold MG, Bowering E, Cole RL: Spatial orientation of rainbow trout to plane-polarized light: The ontogeny of E-vector discrimination and spectral sensitivity characteristics 565

Heitler WJ, Fraser K: Thoracic output of crayfish giant fibres. I. Pereiopod promotor motor neurones 117

Heitler WJ → Fraser K

Hensler K, Robert D: Compensatory head rolling during corrective flight steering in locusts 685

Hiraki K → Seidou M

Hochstrate P: Lanthanum mimicks the trp photoreceptor mutant of *Drosophila* in the blowfly *Calliphora* 179

Hörner M → Gras H

Hörster W: Histological and electrophysiological investigations on the vibration-sensitive receptors (Herbst corpuscles) in the wing of the pigeon (*Columba livia*) 663

Housley GD → Montgomery JC

Howard J → Nilsson D-E

Hoy RR → Brodfuehrer PD

Huang Z, Satterlie RA: Neuronal mechanisms underlying behavioral switching in a pteropod mollusc 875

Illnerová H, Trentini GP, Maslova L: Melatonin accelerates reentrainment of the circadian rhythm of its own production after an 8-h advance of the light-dark cycle 97

Jacobs SC → Masters WM

Janik DS, Menaker M: Circadian locomotor rhythms in the desert iguana. I. The role of the eyes and the pineal 803

Janik DS, Pickard GE, Menaker M: Circadian locomotor rhythms in the desert iguana. II. Effects of electrolytic lesions to the hypothalamus 811
